

“Perception reveals what’s possible to know in physical and nonphysical life. It’s like a combination telescope-microscope you focus with attention; how much you see depends on the frequency of your consciousness. Higher frequency consciousness-and-energy fine-tunes perception, allowing you to see into the nonphysical realms, and ultimately, how the nonphysical and physical worlds intimately blend with each other.”

# Sample Interview Questions • 1

## INTRODUCTION TO THE BOOK

Your book is called *Leap of Perception: The Transforming Power of Your Attention*. Can you briefly explain what it’s about?

I know you say this book is the third in your “Transformation Trilogy”—and the first two are *The Intuitive Way* and *Frequency*. How do the books in this trilogy work together?

What are some of the main premises in *Leap of Perception*? How is the book organized? What will readers learn?

How did you come to write this book? How does your information come to you? Do you think there’s a reason the material you’re writing about is showing up at this particular time—when we’re in the midst of dramatic global change?

## HOW IS OUR PERCEPTION TRANSFORMING?

You say we’re in the midst of a transformation process—at both a personal and societal level—and you call this the shift from the Information Age to the Intuition Age. But what are we transforming into? What will the Intuition Age be like? And how does the “Leap of Perception” figure in?

In your book you describe a shift in perception that will create a huge change in the way we actually know reality. And in fact, you say we’ll experience ourselves as a new kind of human being. What is this the shift—or “leap”—and how does it occur?

What do you mean by “old” linear perception and “new” spherical-holographic perception? What’s the difference?

## WHY IS ATTENTION SO IMPORTANT RIGHT NOW?

You talk about the problems we face today concerning fragmented, shallow attention, distraction, and attention “deficit.” So much of this is caused by our technology, isn’t it? How can we remedy this? Is technology good or bad?

What do you mean by attention? And how can we use our attention in more effective, productive ways? Why is it so important?

## WHAT ABOUT THE RIGHT AND LEFT BRAIN?

There is much talk today about neuroscience and the brain. How does what you’re saying fit with this new area of study?

Can you tell us why you say we need to shift from left brain dominance to the perception of the right brain, heart, body, and cells? How do we get things done with the left brain taking second place?

What does too much left brain perception do to us? How does it contribute to “linear” perception? What are some ways we can make the shift to our right brain and the “new” perception?

What are some of the unhealthy perceptual habits fostered by the reptile brain and right brain? Can we change these things?

“These days, with the world’s acceleration, expanded abilities are likely to develop without trauma, just by keeping your vibration at the level of your home frequency, working to become more transparent, and settling into the realization that you are much more than you’ve ever thought. You’ll find, too, that as one ability opens, it’s tied closely to other abilities, and several may occur in rapid sequence.”

## Sample Interview Questions • 2

### SKILLFUL PERCEPTION AND THE NEW “ATTENTION SKILLS”

You talk about “skillful perception”—what is that?

The chapters in the last part of your book describe 9 new ways of perceiving—what you call new “attention skills”—that will be normal in the Intuition Age reality. You say if we can learn them now, we’ll step into the new reality smoothly, without struggle. Can you tell us a little about (note to interviewer: pick a few!):

*Practice Direct Knowing*

*Practice the Spherical-Holographic Reality*

*Practice Undivided Attention*

*Practice Flow Attention*

*Practice Unified Field Attention*

*Practice Collective-Self Attention*

*Practice Shaping the Imaginal Realm*

*Practice “New Human” Abilities*

*Practice “Pretend Dying”*

### BECOMING A NEW KIND OF HUMAN BEING

Can you describe what you mean when you say we’re becoming a new kind of human being? How will we feel? Will we behave differently? What are some of the things we may experience as the “new human being” of The Intuition Age?

What do you think about the “new children”?

What do you mean when you talk about becoming transparent?

How does living in our home frequency—what you call “saturating with soul”—cause us to find and fulfill our destiny? Do you think destiny is different from what some people call “life purpose”?

You’ve said that many things we take for granted and understand via “old perception” will change and be totally redefined when we see them with “new perception.” Can you give us some examples?

Yours is a very hopeful message. Why do you feel this way when things seem to look so depressing on earth?

### WHAT DO YOU DO TO STAY IN TUNE WITH EVOLUTION?

What advice can you give about how to remain stable in these intense times? What do *you* do?

How can we get the best guidance from our own soul?

Many people are becoming extremely sensitive and empathic today. People feel overwhelmed and somewhat paralyzed by the negativity. What would you say to them? Why is this happening? Will this normalize in some way?
